on windows and mac? mmmm yum [yum install mysql] hello how to install and configure maverick for gajim in lubuntu?
spudULAN: Please don't flood; use to paste; don't use Enter as punctuation. spudULAN: there is no Lubuntu sorry my english
no way to install custom GRUB1 with Lubuntu? yes there is Marlenee you mean, grub2? ikonia: so? spudULAN: what?
MonkeyDust : yes grub2 where do I set up my Ubuntu so that I have access to the modem port in my router without logging on
via windows in order to connect? Marlenee: yes you can, just install grub2 Marlenee: you can, the installer makes grub's
grub.cfg and can create an entry if wanted ragnar: setup in...windows? ragnar: that will not work somsip, no, from the ubuntu
server Marlenee: why do you think you need to? ragnar: I misread the question. In ubuntu, why not just set up a modem/router
as a modem and not router? ikonia, I need to plug it in and use the modem port ragnar: ok, so do that that's what I was asking
ragnar: make sure you don't set the modem as a dhcp server, and make sure you have no firewall on the modem/router I know it
works with Ubuntu and Windows, but my Ubuntu server is also a router ragnar: ok, so yes, it should work 82157476af
